A CORRESPONDENT of Land and Water calls attention to the singular prevalence of blindness in salmon in the York River, which flows into the Gulf of St. Lawrence at Gaspe, the extreme eastward point of Canada proper. In some instances fish have been taken that are totally blind, both eyes being covered with a hard, opaque scale, while in others one eye only is thus affected; again, some have their eyes apparently sloughing away. Se complete is the blindness that a man may drop down in to say nothing of the fact that the cona bark canoe right over the fish, and chip him out with a gaff.
